

SIRAJ UPS & SOLAR

Official User Manual & Operations Guide v1.0

1. System Overview & Quick Access

Welcome to the official desktop software for **Siraj UPS and Solar**. This software is custom-designed for managing sales, inventory, customer udhaar (credit), supplier purchases, repair services, shop expenses, and financial reporting.

Access Method	Details / Location
Desktop Shortcut	Double-click ' Siraj UPS and Solar ' on your Windows Desktop
Standalone EXE	`SirajUPS_Software.exe` inside `Siraj UPS Software Portable` folder
Admin Username	`admin`
Admin Password	`admin1234`
Local Web Address	`http://127.0.0.1:8000` (Main Shop Computer)

2. Core Software Modules & How to Use

A. POS Billing & Invoicing (Fast Counter Sales)

- Select or search for products by Name, SKU, or Barcode.
- Adjust quantity, unit price, or apply item discounts dynamically.
- Select Customer (Walk-in Cash or specific Registered Customer).
- Choose Payment Method: **Cash**, **Online / Card**, or **Udhaar (Credit)**.
- Click **Complete Sale & Print Invoice** to generate a clean PDF receipt with shop logo.

B. Products & Inventory Management

- **Add Products:** Enter Product Name, Category (UPS, Battery, Solar Panel, Inverter, Wire, etc.), SKU, Cost Price, Selling Price, and Alert Quantity.
- **Quick Category Modal:** Click **'+ New Category'** to add custom categories instantly without leaving the form.
- **Stock Adjustment:** Click the stock badge to quickly add or remove stock items with audit notes.
- **Low Stock Alerts:** Automatic visual notifications when stock falls below minimum threshold.

C. Customers & Udhaar (Credit) Ledger

- Track customer details, phone numbers, addresses, and total outstanding Udhaar balance.
- When a customer pays back credit, click **'Record Payment'** to update their ledger instantly.
- View complete transaction history and printable customer account statements.

D. Suppliers & Purchases

- Manage battery/solar wholesalers and suppliers.
- Record incoming inventory shipments (Purchases) which automatically update stock levels.
- Track payable balances to suppliers.

E. Shop Expenses & Repair Services

- **Expenses:** Log shop bills, rent, staff salaries, tea/lunch, and transport expenses.

- **Services / Repairs:** Track UPS/Inverter repair jobs, customer equipment, repair status (Pending, In Progress, Ready, Delivered), and service charges.

3. Roles & Shop Settings

- **Shop Settings:** Change Shop Name, Tagline, Phone, Address, Tax NTN, and Upload your Shop Logo.
- **Users & Roles:** Admin users have full control, while Cashiers are restricted to POS billing.
- **Backup & Restore:** Create complete database backups to prevent data loss.

4. How to Use on Multiple PCs / Laptops

Scenario	Step-by-Step Procedure
Option A: Multiple PCs in Shop (Wi-Fi / LAN)	1. Find main PC IP address (e.g. `192.168.1.10`). 2. Keep software running on main PC. 3. On other devices, open browser and type: `http://192.168.1.10:8000`
Option B: Standalone Portable EXE (USB Copy)	1. Copy folder ` <b>Siraj UPS Software Portable` from Desktop to USB Drive. 2. Paste onto any second laptop or computer. 3. Double-click ` <b>SirajUPS_Software.exe` (No installation required).
